★ *Customer Favourite*

On request it may be possible to have some materials pigmented/tinted to most AS2700 Australian Standard Colours.

*\*Additional charges may apply.*

The colour chart swatches above give a guide only to colours available. These colours are indicative and may not be entirely representative of the product finish or colour when applied over large areas. The actual finish colour may differ from the above due to; printing using different printers and/or paper; viewing on different digital screens; viewing in different light; additives including non-slip aggregates; as a result of the colours pigments used in different chemical technologies (i.e. epoxies, polyurethanes, acrylics, MMA's, polyaspartic's). Some materials & products may be different in levels of gloss and texture.
