# AUTOMOTIVE WORKSHOP FLOOR COATING SYSTEMS

Automotive Workshop floors need to be tough and extremely durable to handle the everyday stresses of a workshop environment. Multiblast's epoxy resin flooring systems are the perfect solution to withstand heavy vehicle traffic, chemical spillages, and hard industrial wear that automotive workshop floors experience daily, while continuing to provide an attractive, safe, and easy to clean surface.

At Multiblast, our industrial flooring systems can be tailored and adapted to suit the environmental needs of any workshop. With seamless, brightly coloured resin options available, our epoxy systems allow for colour zoning, demarcation, coving and drainage, whilst also offering tailored slip resistance.

## Durable & Abrasion Resistant

Hard wearing and resistant to heavy vehicle traffic and daily workshop wear and tear

## Slip Resistant & Safe

Available in a range of textures to provide a non-slip surface in accordance with Australian Standards

## Chemical & Oil Resistant

An impervious coated surface that protects the floor and is easy to clean

## Reduces Tyre Squeal

High textured finish to minimise noise created by vehicle tyres

## Enhances Appearance

A seamless floor finish available in a range of colours. Brightly coloured line marking promotes an organised, safe, and professional workshop

## Longevity

A quality long-term & low maintenance flooring solution specifically designed to suit the needs of your workshop

# ADVANTAGES OF AN AUTOMOTIVE WORKSHOP FLOORING SYSTEM

## DURABLE & ABRASION RESISTANT

Automotive Workshop floors are continuously exposed to heavy vehicle traffic, chemicals, and abrasion from tyres, tools and moving equipment, therefore highly durable coatings are essential. Our epoxy flooring options include high strength coating systems specifically designed to withstand high impact and heavy vehicle traffic over time.

## SLIP RESISTANCE & SAFETY

With the ability to deliver a non-slip finish and customised demarcation & line marking, epoxy floor coatings help to protect the safety of staff whilst also maintaining Workplace, Health & Safety requirements. With the inclusion of Aluminium Oxide grit additives during the coating process, we can alter the slip resistant properties of the finished floor. Traction can be improved, and a slip rating (P0 to P5) can be achieved with NATA approved slip test reporting available in accordance with the Australian Standards.

## CHEMICAL & OIL RESISTANCE

Epoxy coatings are specifically designed to be resistant to common workshop chemicals such as battery acid, engine oil, petrol, diesel, antifreeze and brake fluid. The coating systems offer a sealed and impervious surface so that cleanability is greatly improved and staining is minimised.

## REDUCES TYRE SQUEAL

Our epoxy floor coatings can be adapted to prevent the noise made by tyres, often referred to as 'tyre squeal'. A trafficable coating can greatly improve the traction between tyres and the floor surface, and as a result these unpleasant noises are minimised.

## COLOURFUL, ATTRACTIVE & SAFE

The appearance of a workshop can be greatly improved by incorporating various colours, demarcation, line marking and signage into the floor finish. Our coatings come in a wide range of colours with customised line marking and layout options available. Safety line marking and walkways can be installed to ensure staff safety and assist with workshop organisation.

## LONGEVITY

The durability, high impact and chemical resistant properties of epoxy coatings ensure a long-term flooring solution for your workshop.

## APPLICATION SUITABILITY:

- ◆ SERVICE WORKSHOPS
- ◆ VEHICLE WASH BAYS
- ◆ TRUCK WORKSHOPS
- ◆ EXTERNAL CARPARKS
- ◆ EXTERNAL DRIVEWAYS
- ◆ RAMPS

# TECHNICAL PROFILE

<b>Colour Options:</b>	Australian Standard AS2700 Colour Chart & RAL Colour Standards
<b>Slip Resistant</b>	P0-P5 / R0-R12 Slip Rating
<b>Thickness</b>	400 microns to 6000 microns (0.4mm - 4mm)
<b>Temperature Resistance</b>	0°C - 65°C (Standard) High temperature options available
<b>Finish</b>	Gloss or Satin
<b>Environmentally Friendly</b>	Green Star certified and low VOC product options available
<b>UV Light Resistant*</b>	UV stable top-coats available
<b>Warranty</b>	Up to 15 Years

\* Further technical information available on request
